The slides were, I think, excellent. Gary Odendaal. People need to want to come to my talks.

A consequence of this is that you need fewer APIs and bootstraps; for most dep

This gets tricky with serverless apps because you need to build authentication into every function that gets accessed directly while accounting for the ephemeral nature of your functions. While some are relatively innocuous, security mistakes can cause some serious damage. It is most useful when you have queries with operations using the prefix of the sortkey.
